eatrrite.com Developer Brief

Oct 31, 2026 · @Mukta Patil

Fixes, optimisation and automation for www.eatrrite.com. The design, fonts, colours, logo and existing text stay as they are. This brief closes loopholes, adds the missing trust sections, speeds the site up and makes it visible in search, so it gets Mukta Patil found, builds trust and turns visitors into booked consultations, ready for Google and Meta ads. Each item is tagged **P1** (this week), **P2** (within 3 weeks) or **P3** (before ads go live or ongoing).

1. Goals and ground rules

Every change in this brief serves one of three goals. If a change doesn't help at least one of them, leave it out.

Goal	What it means on the site	How we measure it
Visibility	Mukta Patil and Eat Rrite show up on Google for her name, her brand and her topics (weight, diabetes, gut, PMOS, perimenopause), in India and for NRIs	Search Console clicks and impressions, Google Business Profile views
Trust	A 35+ visitor sees within seconds who she is, her qualifications, real client results and that she works alongside doctors	Time on page, About page visits, review count
Client turnover	Every page leads to one clear next step: book a consultation or WhatsApp	Bookings, WhatsApp clicks, cost per booking once ads run

Ground rules:

- **No changes** to the design, fonts, colours, logo (or where it sits), layout or existing text, except the specific fixes in this brief. Wherever wording needs fixing, the exact text to copy and paste is given.
- **Fees:** the ₹800 consultation confirmation fee stays as it is. Program fees stay unpublished, on purpose.
- **PMOS** is used on purpose: it's the official new name for PCOS/PCOD (May 2026).
- **Do not mention** the product line anywhere.

- **Client names, photos and stories** only with written consent on file. Never use WhatsApp chat screenshots (they show other people's chats).
- **Handles:** Instagram @muktapatil01 and @eatrrite, LinkedIn linkedin.com/in/19muktapatil, YouTube, Medium.

2. Order of work

Phase	When	What	Sections
P1: Close loopholes	Week 1	Redirect old pages, fix broken and placeholder items, tap-to-call, WhatsApp button, page titles and descriptions, Search Console, sitemap	3, 4, 5.1, 6.1, 6.2, 6.5
P2: Trust and visibility	Weeks 2–3	Credentials & Media section, old newspaper articles on the site, testimonials, Google and YouTube reviews, social media connections, structured data, page speed	5.2–5.5, 6.3, 6.4, 7, 8
P3: Automation and ads-ready	Before the first ad	Booking automation, tracking, ad landing pages, consent banner	9, 10
Ongoing	Monthly	Blog articles, new reviews, monthly report	11

Work in a staging copy, show Mukta before going live, and keep a backup of the current site.

3. Old website clean-up (P1)

Google still shows the old site: the old homepage text ("Best Nutritionist Services In India", "Post Natal NutriCare", "Celiac And Crohn's Disease"), /founder-profile.php, and /nutricare-for-mom-to-be.php, which now returns an error. Every old address must permanently redirect (301) to its closest new page, so the ranking it earned carries over.

Old address (confirmed or likely)	Redirect to	Note
/founder-profile.php	/about	Move its credentials and story onto About first (section 5)
/nutricare-for-mom-to-be.php	Female Hormone Health page	Currently broken
Old Post Natal NutriCare & Weight Loss page	Female Hormone Health page (postpartum)	Find the exact address in the old sitemap
Old Weight & Lifestyle Management Program page	New Weight program page	
Old Diabetes Management And Reversal Diet Plan page	New Diabetes program page	
Old Gut Health Diet Program page	New Gut Health page	
Old Female Hormone Health Diet Program page	New Female Hormone Health page	
Old Celiac And Crohn's Disease page	New Gut Health page	
/index.php	/ (homepage)	One homepage address only
http:// (any page)	https:// (same page)	
eatrrite.com (no www)	www.eatrrite.com, or the reverse	Pick one version and redirect the other, site-wide

- [ ] **P1** Get the full list of old addresses from the old site's sitemap, the hosting files, or Search Console's "Pages" report (look for 404 errors). Add every one to the table above.
- [ ] **P1** Set up the 301 redirects at server level (.htaccess or hosting panel), not with JavaScript.
- [ ] **P1** Delete old pages from the server once they redirect. No two versions of the same content should stay live.
- [ ] **P1** Make the 404 page branded (logo, "This page has moved", links to Programs, Book a Consultation and WhatsApp).
- [ ] **P2** After four weeks, check Search Console for leftover 404s and redirect them too.

4. Site-wide fixes

Header

- [ ] **P1** Make the phone number a tap-to-call link (tel:+919639877483) and the email a tap-to-mail link (mailto:info@eatrrite.com). Both are plain text today.
- [ ] **P1** Give the ☰ menu button an accessible label ("Open menu") and check it opens on every page on iPhone and Android.
- [ ] **P2** The hours shown in the header and footer ("Mon–Sun 10:00 am–7:00 pm") clash with the booking slots. See the copy-paste fix in 5.1, Booking.

Floating buttons (mobile)

- [ ] **P1** Add a sticky bottom bar on mobile with **WhatsApp** and **Book Appointment**, styled like the site's existing buttons. On desktop, a small floating WhatsApp button bottom-right.
- [ ] **P1** Replace the raw WhatsApp address printed as text at the bottom of the Pricing and Contact pages with that button.
- [ ] **P2** Pre-fill the WhatsApp message per page (e.g. "Hi, I'd like to know about the Diabetes program") so each enquiry shows which page it came from.

Footer (every page)

- [ ] **P1** Social icons with links: Instagram @muktapatil01, Instagram @eatrrite, LinkedIn, YouTube, Medium (and Facebook, if the page exists). There are no social links anywhere on the site today.
- [ ] **P2** Links to the legal pages (section 8).
- [ ] **P2** Copyright year updates automatically.
- [ ] **P3** Add one disclaimer line before ads start. Copy: "General guidance, not medical advice. With a medical condition, follow your doctor."

Everywhere

- [ ] **P1** Remove the stray "meta-description / meta-viewport / title" text that shows in the visible body of some pages (About, Booking).
- [ ] **P2** A favicon (the logo mark, as it is) at 32×32 and 180×180 for iPhone home screens, if missing.
- [ ] **P2** A share preview (Open Graph) for every page: title, description and a 1200×630 image. This is what shows when a link is shared on WhatsApp, Facebook or LinkedIn.

5. Page fixes and new sections

5.1 Loopholes on existing pages (P1)

Code fixes only, except where copy-paste text is given.

Home

- [ ] Duplicate heading: H2 "Where food becomes medicine" is followed by H3 "Where Food Becomes Medicine". Delete the repeated H3.
- [ ] The stat label "Stories / Real Client Stories" reads like a leftover template label. Copy: **Client Stories**.
- [ ] Program cards: the link text shows "program.php?slug=…". Keep the visible "Learn More", and add a hidden label for Google and screen readers (aria-label="Learn more about Diabetes Management & Reversal", and so on).
- [ ] Blog cards show "04" as a date and all three "Read More" links go back to /blog.php. Hide the section until the Media articles (5.3) are live, then show the 3 latest with full dates (e.g. 10 Oct 2019), each linking to its own article.
- [ ] The FAQ illustration has no alt text. Add: "Mukta Patil answering common nutrition questions".
- [ ] Mark the FAQ questions up as H3 headings and add FAQ structured data (6.4). No text change.
- [ ] The "4.8★ Google Rating" stat must link to the Google reviews page (Mukta to share the link, section 12). Show the live rating there with a reviews widget (5.4).
- [ ] Testimonial names are H4 tags under an H2. Change them to plain bold text (code only).

About

- [ ] Typos, exact copy-paste fixes: "every one and every symptom" → **"everyone and every symptom"** · "remains Unchanged" → **"remains unchanged"** · "no generalisation ever !" → **"no generalisation, ever!"** · "well nourished" → **"well-nourished"**.
- [ ] "Our Story" and "What guides us" are plain text. Make them H2 headings (code only).
- [ ] Add the new Credentials & Media section (5.2) below the story.

Program pages (all four)

- [ ] Each page has an H1 plus an H2 that repeats it (e.g. "Gut Health" + "Nutrition for Gut Health"). Keep the text, but make the second one a styled subtitle instead of an H2.
- [ ] Make "About the Program" and "Packages" H2 headings (code only).
- [ ] Give each image its own alt text. Both diabetes images share one today, and the hero images have none.

- [ ] Breadcrumb reads "Program". Copy: **"Programs"**.
- [ ] Female Hormone Health page description (meta only). It reads "perimenopause/PMOS", which joins two conditions. Copy: **"Nutrition for PMOS (earlier PCOS/PCOD), perimenopause, menopause and postpartum recovery."**

Pricing

- [ ] Remove the stray duplicate "Pricing" line between the breadcrumb and the H1.
- [ ] The "Most Popular" label sits after the 30-Day button. Move it onto the 90-Day card.
- [ ] Add hero image alt text.

Booking (appointment page)

- [ ] Two H1s ("Book Appointment" and "Reserve your slot"). Keep "Book Appointment" as the H1 and make "Reserve your slot" an H2.
- [ ] The calendar shows no dates or times in the page itself. Test that dates and slots load and can be picked on iPhone Safari and Android Chrome.
- [ ] Hours clash: the site says "Mon–Sun 10:00 am–7:00 pm", but slots run until 9:30 pm Mon–Thu, with none on Friday. Copy-paste for the header and footer hours line: **"Consultations by appointment · Mon–Sun"**, with the exact slots kept on the booking page.
- [ ] The service dropdown names differ from the program names (e.g. "Nutrition for Gut Health" vs "Gut Health"). Make the dropdown match the footer names.
- [ ] Mobile number field with a country code picker (+91 default). Show slots in the visitor's own time zone with IST beside them, for NRI clients.
- [ ] The page doesn't say how the Meet link arrives. Copy-paste under the pay button: **"After payment you'll get a short questionnaire. Your Google Meet link follows on WhatsApp and email."**
- [ ] Add a consent tick box (not pre-ticked) with a link to the Privacy Policy.
- [ ] After payment, send the visitor to a thank-you page (/thank-you) that confirms the slot and has an "Add to calendar" button. This page is what Google and Meta count as a booking (section 10).

Contact

- [ ] The page describes a form (name, phone, city, program of interest) that doesn't exist. Build that form, with a consent tick box, so the page does what it says.
- [ ] Tap-to-call, tap-to-mail, and the WhatsApp button in place of the raw address.
- [ ] Alt text on the hero image and header logo.

Blog

- [ ] Remove the 3 placeholder posts. They're replaced by the Media articles (5.3).

5.2 New section: Credentials & Media (P2)

Where: on the About page, below the existing story. Add a one-line strip on Home under the hero that links to it. **Look:** the site's existing fonts, colours and card style; no new design elements. The story runs as normal text, followed by three short rows (highlights, featured in, spoken at) and a row of "Read" cards linking to the articles.

Copy to paste: heading and story

> **Credentials & Media**
>
> *From her own healing to classrooms, newspapers and stages across India.*
>
> Mukta Patil was always a science student who dreamt of becoming a doctor. Life took a different turn, and years later it was her own health that led her back to science. She began to read, study and test what she learnt on herself, and in healing her own body she found her purpose: helping others heal through food.
>
> That purpose turned into serious study. Mukta earned her Diploma in Nutrition and Health Education from IGNOU, gained certification from INFS Pune, and completed coursework from Harvard University, Stanford University, Ludwig Maximilian University of Munich and the University of Colorado. To care for the whole person, not just the plate, she became a Yoga Alliance certified yoga teacher (RYT-200), an NLP Practitioner through the NLP Academy, and a certified life coach. In 2018 she made Eat Rrite official, and today she guides clients online in more than 10 countries.
>
> Her voice soon reached readers. In 2019 she wrote "Body Basics", a nutrition column in The New Indian Express, and she went on writing for the paper, including "Paint Your Plate Red" in 2021. The Deccan Chronicle has quoted her as a nutrition expert, and in 2026 The Lead Reporting featured her in its International Women's Day interview, "Strong Women, Strong Health", and published her article on the science of yoga.
>
> She is invited to speak, too. Mukta has led health and wellness sessions for the Indian Army, including ASC Army units, and for ONGC, and has spoken at the Millet Festival. In Dehradun she was chief guest at Clover Organic's "Wellnest" evening in 2023, where she encouraged farmers to grow nutrition-rich produce. She has also taught nutrition to students and communities through Kendriya Vidyalaya, Suchitra School and NGO groups.
>
> In 2024 her work was recognised with the Global Sustainability Award for SDG-3, Good Health and Well-being.
>
> In every classroom, column and talk, her message stays the same: eat right, and the body knows how to heal.

Copy to paste: three rows under the story

Row	Text
Highlights	Since 2018 · Clients in 10+ countries · Yoga Alliance RYT-200 · Global Sustainability Award 2024 (SDG-3)
Featured in	The New Indian Express · Deccan Chronicle · The Lead Reporting · The Pioneer · Buziness Bytes
Spoken at	Indian Army (ASC units) · ONGC · Millet Festival · Clover Organic "Wellnest", Dehradun

Show the publication names as plain text, not newspaper logos (the logos belong to the publishers).

"Read" cards (each opens the article in a new tab):

Card title	Publication and date	Link
All of Mukta's articles	The New Indian Express	https://www.newindianexpress.com/author/mukta-patil
Paint Your Plate Red	The New Indian Express, 8 Apr 2021	https://www.newindianexpress.com/hyderabad/2021/Apr/08/paint-your-plate-red-2287196.html
'Spicy' Indians (quoted as a nutrition expert)	Deccan Chronicle, 26 Jun 2025	https://www.deccanchronicle.com/tabloid/hyderabad-chronicle/spicy-indians-1887738
Strong Women, Strong Health: Mukta Patil on Wellness, Balance and Breaking Barriers	The Lead Reporting, 10 Mar 2026	https://leadreporting.co.in/273/Strong_Women,_Strong_Health:_Mukta_Patil_on_Wellness,_Balance_and_Breaking_Barriers
The Science of Yoga: Beyond Exercise, a Gateway to Holistic Well-Being	The Lead Reporting, 4 Jun 2026	https://leadreporting.co.in/351/The_science_of_yoga_beyond_exercise_a_gateway_to_holistic_well_being

Card title	Publication and date	Link
Listen. Hear. Understand & Live!	Medium	https://medium.com/@19mukta/listen-hear-understand-live-e2281bc088b1

Photos: use the event photos in Drive › Eat Rrite Photo Library › 03 Talks, Sessions & Events. Event 002 is the Indian Army health and wellness session (27 Dec 2023). Mukta will caption the others (section 12). Each photo needs alt text naming the event.

Home strip, copy to paste: "Nutritionist, Yoga Teacher & Life Coach · Since 2018 · Featured in The New Indian Express and Deccan Chronicle · Clients in 10+ countries", linking to this section.

Behind the scenes: add the qualifications to Mukta's Person structured data as hasCredential, the award as award, and every article link above under sameAs or subjectOf (6.4).

5.3 New: Media page with the old newspaper articles (P2)

Each of Mukta's New Indian Express columns becomes its own article page. This fills the blog with genuine, dated, expert content straight away, and Google can only read the articles if the text is typed out, not shown as an image.

#	Article title	First published	Drive file (04 Press & Media)	Address
1	Mind your calories	22 Aug 2019	Press 003	/blog/mind-your-calories
2	The A–Z of child nutrition	12 Sep 2019	Press 002 (also 004)	/blog/a-z-of-child-nutrition
3	The blueprint for good health	10 Oct 2019	Press 001	/blog/blueprint-for-good-health
4	Should you try out the latest diets?	31 Oct 2019	Press 006 (also 011)	/blog/should-you-try-the-latest-diets
5	Can detox diets really flush out toxins from the body?	2019 (date to confirm)	Press 010	/blog/can-detox-diets-flush-out-toxins
6	Macro-micro nutrient balance, key to good health	2019 (date to confirm)	Press 009 (also 005)	/blog/macro-micro-nutrient-balance

#	Article title	First published	Drive file (04 Press & Media)	Address
7	Good cholesterol, bad cholesterol	2019 (date to confirm)	Press 008	/blog/good-cholesterol-bad-cholesterol
8	Homecooked food, first step towards health	2019 (date to confirm)	Press 007	/blog/homecooked-food-first-step-to-health

Each article page:

- ☐ Title (H1), then the line **"First published in The New Indian Express, 'Body Basics' column, [date]."**
- ☐ The clipping image, with alt text "Mukta Patil's column in The New Indian Express, [date]".
- ☐ The full article text, typed out exactly as printed, with subheadings as H2. Claude can supply clean text for each from the clippings.
- ☐ Author box: Mukta's photo, name, "Nutritionist, Yoga Teacher & Life Coach" and a link to About.
- ☐ Link to the original e-paper page where known: 10 Oct 2019 epaper.newindianexpress.com/c/44513938 · 12 Sep 2019 /c/43504147 · 31 Oct 2019 /c/45224864.
- ☐ A related program card, then **Book Appointment** and **WhatsApp**.
- ☐ Article structured data with the original publication date.

/media page: a grid of the 8 articles (clipping thumbnail, title, date), an "In the news" row for the 2023 Dehradun coverage (Pioneer and Buziness Bytes clippings: Press 012 and 013), and the YouTube and Instagram blocks from 5.5.

Before publishing: check that Mukta's agreement with The New Indian Express allows her to reprint her own columns in full. If unsure, publish the clipping, a 3–4 line summary and the e-paper link instead.

Also on /media: an "Online articles and interviews" list with the same six links as the Read cards in 5.2 (New Indian Express author page and "Paint Your Plate Red", Deccan Chronicle, both Lead Reporting pieces, Medium). These stay on the publishers' sites. Link to them; don't copy their text.

5.4 Testimonials and reviews (P2)

- ☐ **Google reviews:** show the live Google rating and latest reviews with a reviews widget, plus a "See all reviews on Google" link. Mukta to share the Google profile link (section 12).

- [ ] **YouTube testimonials:** embed Mukta's client testimonial videos (click-to-load thumbnails, so the page stays fast), with VideoObject structured data. Mukta to share the video links.
- [ ] **Written testimonials:** add to the existing testimonials area and to the /media page. Format: quote · first name · city/country · program · month and year. Only with written consent.
- [ ] **Automation:** when a program ends, send an automatic WhatsApp asking for a Google review, with the direct review link (9).

Testimonial to add, copy to paste (Anju's own words, lightly corrected for grammar; consent to be confirmed):

> "I run a language centre in Madrid, Spain. Stress with my students and my children had me overeating. I met Mukta as my new neighbour at a Ganpati utsav, and after my holiday in India I contacted her to give it a serious chance. My aim was better gut health and learning to eat at the right times and in the right quantities. I also wanted to show my daughter that losing excess fat isn't impossible. Within a few weeks I was motivated, and as I saw the difference, I followed the plan sincerely, even while travelling. After the 12-week plan, I chose a second round. Today I feel lighter and more energetic, I sleep better, and I've gone from XXL to L/M. Once, in an emergency, I even fitted into my son's T-shirt! Some of my family have joined the programme too."
>
> **Anju, Madrid, Spain** · Weight & gut health · 2025

5.5 Social and digital media connections (P2)

- [ ] **Instagram:** an embedded feed of the latest 6 posts (@eatrrite, or @muktapatil01 if Mukta prefers) on Home and /media, lazy-loaded so it doesn't slow the page.
- [ ] **YouTube:** a "Latest videos" block on /media with a Subscribe button. Each reel or video posted on the blog is embedded with a click-to-load thumbnail.
- [ ] **LinkedIn and Medium:** linked in the footer and in the author box. When a site article is reposted on Medium, its canonical link points back to eatrrite.com.
- [ ] **Meta:** connect the Facebook Page, both Instagram accounts and the WhatsApp Business number in one Meta Business Portfolio owned by Mukta, and verify the eatrrite.com domain (10).
- [ ] **Google Business Profile:** the website links to it and it links back to the website and booking page.
- [ ] **Every profile's bio link** points to the website with tracking tags (10.5).
- [ ] **Structured data:** list every profile under sameAs (6.4), so Google connects them all to Mukta and Eat Rrite.

6. SEO

6.1 Google and Bing tools (P1)

- [ ] Verify the site in **Google Search Console** using the marketing account (marketing.eatrrite@gmail.com). Add Mukta as owner.
- [ ] Submit /sitemap.xml. Then use URL Inspection → "Request indexing" on Home, About, Programs and each program page.
- [ ] Verify in **Bing Webmaster Tools** (import from Search Console in one click).
- [ ] Create the **Google Business Profile** (section 8).

6.2 Page titles, descriptions and H1s (P1)

Titles under about 60 characters, descriptions under about 155. Every page must have a unique title, description and one H1.

Page	Title tag (copy-paste)	Description (copy-paste)
Home	Keep: Eat Rrite | Holistic Nutrition Coaching in Hyderabad & Dehradun	Online nutrition coaching with the Indian food you already eat. Weight, diabetes, gut, PMOS and perimenopause care with Mukta Patil.
About	Mukta Patil: Nutritionist, Yoga Teacher & Life Coach	Founder of Eat Rrite since 2018. Nutrition, yoga and counselling for whole-person health, online across India and abroad.
Programs	Online Nutrition Programs with Indian Food | Eat Rrite	Keep the current one.
Weight	Weight Loss with Indian Food (Online) | Eat Rrite	Keep the current one.
Diabetes	Diabetes Diet Plan with Indian Food (Online) | Eat Rrite	Keep the current one.
Gut Health	Gut Health Diet for Acidity, Bloating & GERD | Eat Rrite	Keep the current one.
Female Hormone	PMOS (PCOS/PCOD), Menopause & Hormone Diet | Eat Rrite	Nutrition for PMOS (earlier PCOS/PCOD), perimenopause, menopause and postpartum recovery.

Page	Title tag (copy-paste)	Description (copy-paste)
Pricing	Nutrition Program Plans: 30, 90 & 180 Days | Eat Rrite	Keep the current one.
Booking	Book an Online Nutrition Consultation | Eat Rrite	Keep the current one.
Contact	Contact Eat Rrite: WhatsApp, Phone & Email	Message Mukta on WhatsApp or book an online consultation.
Blog	Nutrition & Wellness Blog by Mukta Patil | Eat Rrite	Keep the current one.
Media (new)	Mukta Patil in the Media | Eat Rrite	Mukta Patil's columns in The New Indian Express, talks and press coverage.

Only the hidden title and description change. The page text and H1s stay as they are, apart from the duplicate-heading fixes in 5.1.

6.3 Clean web addresses (P2)

Now	New
/index.php	/
/about.php	/about
/programs.php	/programs
/program.php?slug=weight-lifestyle-management	/programs/weight-loss-indian-food
/program.php?slug=diabetes-management	/programs/diabetes-diet-plan
/program.php?slug=gut-health	/programs/gut-health-diet
/program.php?slug=female-hormone-health	/programs/female-hormone-health
/pricing.php	/pricing
/appointment.php	/book
/contact.php	/contact
/blog.php	/blog (articles at /blog/article-name)
(new)	/media

Every old address 301-redirects to its new one. Update all internal links to the new addresses (not relying on redirects).

6.4 Structured data (P2)

Add as JSON-LD in the page head and test each with Google's Rich Results Test.

- [ ] **Organization / ProfessionalService** (site-wide): name Eat Rrite, logo, URL, phone, email, areaServed (India + worldwide online), sameAs (Instagram, LinkedIn, YouTube, Medium).
- [ ] **Person** (About page): Mukta Patil, jobTitle "Nutritionist, Yoga Teacher & Life Coach", worksFor Eat Rrite, alumniOf IGNOU, hasCredential list, image, sameAs (@muktapatil01, LinkedIn, Medium, YouTube).
- [ ] **FAQPage** on Home and each program page.
- [ ] **Service** on each program page (name, description, provider Eat Rrite, areaServed).
- [ ] **BreadcrumbList** on all inner pages.
- [ ] **Article** with author Mukta Patil and datePublished on every blog post.
- [ ] **Review / AggregateRating** only once real Google reviews exist. Never fake or self-written.

6.5 Technical SEO (P1–P2)

- [ ] **P1** /sitemap.xml lists only live, final pages (no old .php, no thank-you page). It updates automatically when pages or articles are added.
- [ ] **P1** /robots.txt allows all public pages, points to the sitemap and blocks /thank-you and admin areas.
- [ ] **P1** A self-referencing canonical tag on every page. Programs pages must not be duplicates of each other.
- [ ] **P1** HTTPS on every page with no mixed-content warnings.
- [ ] **P1** The thank-you page and any ad-only landing pages are set to noindex.
- [ ] **P2** Language tag lang="en-IN" on every page.
- [ ] **P2** Image files named by content (mukta-patil-nutritionist.webp, not IMG_2034.jpg).
- [ ] **P2** Internal links: every program page links to 2–3 related articles and back to Book. Every article links to its program.
- [ ] **P2** Remove the stray "meta-description / meta-viewport / title" text that appears in the visible body of some pages (About, Booking).

6.6 Keywords each page should own

Page	Main phrase	Also use
Home	online nutritionist India	Indian food, holistic nutrition, Mukta Patil
About	Mukta Patil nutritionist	yoga teacher, life coach, Hyderabad, Dehradun
Weight	weight loss with Indian food	lose weight without dieting, dal chawal weight loss
Diabetes	diabetes diet plan Indian	sugar control diet, prediabetes diet
Gut Health	gut health diet	acidity, bloating, constipation, GERD diet
Female Hormone / PMOS	PMOS diet	PCOS diet Indian, PCOD diet chart, perimenopause diet, menopause weight gain

7. Speed, mobile and accessibility (P2)

Most visitors, and nearly all ad clicks, arrive on a phone. Slow pages waste ad money and lower Google rankings.

Targets (Google PageSpeed Insights, mobile, for Home, one program page and Booking):

Measure	Target
Performance score	80+
Largest Contentful Paint (main content visible)	under 2.5 s
Interaction to Next Paint (response to a tap)	under 200 ms
Cumulative Layout Shift (page jumping)	under 0.1

- [ ] Run PageSpeed Insights before and after, and share both reports with Mukta.
- [ ] Convert images to WebP, sized to how they display (hero no wider than 1600 px), and lazy-load images below the first screen.
- [ ] Load only the two fonts (Caladea, Poppins Bold/Medium), self-hosted, with font-display: swap.
- [ ] Remove unused scripts, sliders and libraries left over from the old theme. Defer non-essential JavaScript.

- [ ] Turn on caching and compression (gzip or Brotli) on the hosting. Use a CDN (e.g. Cloudflare free plan) if hosting is outside India.
- [ ] Embed reels and YouTube videos with a click-to-load thumbnail, not a full player on page load.
- [ ] Tap targets at least 48 px apart. No text smaller than 16 px on mobile.
- [ ] Text contrast at least 4.5:1 (dark green on beige/white passes; gold text on white usually fails, so use gold for lines and buttons, not small text).
- [ ] Every form field has a visible label, and the forms work with iPhone autofill.
- [ ] Test on iPhone Safari, Android Chrome and desktop Chrome before going live.

8. Trust and compliance

8.1 Proof that builds trust

- [ ] **P2** Credentials & Media section (5.2), Media articles (5.3), testimonials and reviews (5.4).
- [ ] **P2 Google Business Profile:** the site shows "4.8★ Google Rating", but I couldn't find the profile in a search. If it exists, make sure it's managed from the marketing account, with the website, booking link, photos and hours filled in. If it doesn't, create it (online service-area business for Hyderabad and Dehradun, category Nutritionist) before the rating stays on the site.
- [ ] **P2** Reply to every Google review. Ask every client who finishes a program for one (automated, section 9).

8.2 Health claims (needed for trust and for ad approval)

Google and Meta review the landing page as well as the ad, and reject pages with unsupported medical claims.

- [ ] **P3** No wording changes now. If Google or Meta ever rejects an ad because of a line on the page, Claude will supply replacement text for that one line only.
- [ ] **P3** The footer disclaimer line (section 4) is the one addition needed before ads start.

8.3 Legal pages (P2, needed before ads)

Mukta should have a lawyer check the final wording. The developer builds the pages and links them in the footer and on every form.

- [ ] **Privacy Policy:** what data is collected (name, email, phone, health questionnaire answers), why, who it's shared with (Google, Meta, WhatsApp, the payment provider if any), how long it's kept, how to withdraw consent or ask for deletion, and a contact for

complaints (name/email of the person responsible).

- [ ] **Terms of Service**, **Cancellation & Reschedule Policy**, **Disclaimer** (general guidance, not medical advice).
- [ ] India's Digital Personal Data Protection Rules were notified in November 2025, and the main notice-and-consent duties apply from May 2027. Build to them now: a clear notice at every form, a consent box that isn't pre-ticked, an easy way to withdraw, and health answers treated as sensitive.
- [ ] Health questionnaire answers are stored securely (not in plain email), with access limited to Mukta.

8.4 Cookie and tracking consent (P3, before ads)

- [ ] A cookie banner with "Accept" and "Reject" given equal weight, using Google Consent Mode v2, so Google and Meta tags only run fully after consent. This is also needed for NRI visitors in the UK and EU.

9. Booking and conversion

The path to a booking should take three taps from any page, and a visitor should never wonder what happens next.

The path:

1. Visitor lands (from Google, Instagram, an ad or WhatsApp).
2. Taps **Book a Consultation** (header, sticky bar or end of page) or **WhatsApp**.
3. Booking page: program, name, email, mobile (with country code), slot in their own time zone, consent tick, then the ₹800 confirmation payment.
4. Thank-you page (/thank-you): slot confirmed, "Add to calendar", what to expect, WhatsApp button.
5. Automatic WhatsApp and email confirmation with the questionnaire link.
6. Questionnaire done → Google Meet link sent on WhatsApp and email.
7. Reminders 24 hours and 1 hour before, on WhatsApp.

- [ ] **P1** Fix the booking calendar, H1s and hours clash (5.1).
- [ ] **P2** Automatic WhatsApp confirmation and reminders using the WhatsApp Business API through a provider (e.g. Interakt, WATI or AiSensy) connected to the booking sheet ("eatrrite-website-appointments"). Mukta to choose the provider.
- [ ] **P2** Booking also creates a Google Calendar event on the marketing account with the Meet link, so double-booking is impossible.
- [ ] **P2** If the slot list is empty for a day, show the next available day rather than a blank calendar.

- [ ] **P2** Short forms only: never ask health questions on the booking form itself. They belong in the questionnaire after booking. This also keeps health data away from ad tracking (section 10).
- [ ] **P2** End every program page and article with the same block: one line from Mukta, **Book a Consultation**, **WhatsApp**.
- [ ] **P3** "Not ready yet?" option: a download page for each free guide Mukta is creating (DIWALI, SUGAR SENSE, MIDLIFE) in exchange for name and WhatsApp number (with consent), at /guides/diwali, /guides/sugar-sense and /guides/midlife. It gives ads a lower-cost first step and builds a list.
- [ ] **P3** Record where each booking came from: hidden fields on the booking form capture the UTM source, medium and campaign (section 10) and save them in the booking sheet.

10. Ads readiness: Google and Meta (P3, before the first ad)

10.1 Accounts and set-up

- [ ] **Google Tag Manager** container on every page. All tags below go through it, not hard-coded.
- [ ] **Google Analytics 4** property (marketing account). Link it to Search Console and Google Ads.
- [ ] **Google Ads** account with the conversion tag and **enhanced conversions** (hashed email/phone from the booking form, only with consent).
- [ ] **Meta Business Portfolio** owned by Mukta (not an agency). Add the Facebook Page, the @eatrrite and @muktapatil01 Instagram accounts and the WhatsApp Business number.
- [ ] **Meta domain verification** for eatrrite.com.
- [ ] **Meta Pixel + Conversions API** (server-side, via GTM server container or the hosting's integration) so events still count when browsers block the pixel.
- [ ] Google Consent Mode v2 and the cookie banner (8.4) control all of the above.
- [ ] Mukta is admin on every account. The developer gets access, not ownership.

10.2 Events to track

Event	Fires when	GA4	Google Ads	Meta
page_view	Any page loads	Yes		PageView
view_program	A program page is viewed	Yes		ViewContent

Event	Fires when	GA4	Google Ads	Meta
click_whatsapp	Any WhatsApp button is tapped	Yes	Secondary conversion	Contact
click_call	Tap-to-call is tapped	Yes	Secondary conversion	Contact
start_booking	The booking page loads, or the first field is filled	Yes		Custom event: start_booking
booking_complete	The thank-you page loads after a real booking	Yes (key event)	**Primary conversion**	Lead, or a neutrally named custom event if Lead is restricted
guide_signup	"Not ready yet" sign-up	Yes	Secondary conversion	Lead

- [ ] Event names and parameters must **never** contain health information (no condition names, symptoms or questionnaire answers), and no personal data in URLs.

10.3 What the platforms' health rules mean for the site

- **Meta:** since January 2025, Meta has put health and wellness websites in a restricted category. It can cut URL details after the domain, and block mid- and lower-funnel events from being used for optimisation. Once the pixel is live, check Events Manager → Settings for how eatrrite.com is classified, and tell Mukta. Upper-funnel events (PageView, ViewContent) generally stay available. Build the events above anyway, and keep the booking source (UTMs saved in the booking sheet) as our own record of which ads bring clients.
- **Google:** Google's Health in Personalized Advertising policy blocks remarketing and personalised targeting for chronic health conditions and similar topics. So expect Search campaigns (people searching "diabetes diet plan Indian") rather than remarketing lists. The Google Ads tag and conversion tracking still work as normal.
- **Landing pages are reviewed too:** no "cure"/"guaranteed" claims, no before/after body photos, a visible disclaimer, privacy policy and contact details (section 8).

10.4 Ad landing pages

- [ ] A landing page template, set to noindex, with: no main menu (logo only), one headline matching the ad, Mukta's photo, 3 benefits, 1–2 client stories, credentials strip, FAQs, one **Book a Consultation** button repeated, and a WhatsApp button. It reuses the brand styles.

- [ ] Pages to build first: /start/weight-loss, /start/diabetes, /start/pmos-perimenopause, /start/midlife-reset (for the Midlife Reset series), /start/nri (NRI clients: time zones, online, "Indian food wherever you live").
- [ ] Each landing page loads in under 2.5 s on mobile (section 7).

10.5 Link tracking (UTMs)

Every link in ads, Instagram bio, WhatsApp broadcasts and LinkedIn posts carries UTM tags, so bookings can be traced to their source.

Source	Example
Meta ad	?utm_source=meta&utm_medium=paid&utm_campaign=diabetes_nov26
Google ad	?utm_source=google&utm_medium=cpc&utm_campaign=pmos_search (plus auto-tagging)
Instagram bio	?utm_source=instagram&utm_medium=bio&utm_campaign=muktapatil01
LinkedIn post	?utm_source=linkedin&utm_medium=post&utm_campaign=week45
WhatsApp broadcast	?utm_source=whatsapp&utm_medium=broadcast&utm_campaign=diwali26

Campaign names describe the campaign, not a person's condition ("diabetes_nov26" names the program, which is fine).

11. Blog set-up and measurement

11.1 Blog template (P2)

Mukta writes the articles (turned from her reels). The developer builds a template she can post to from her iPhone.

- [ ] Each article gets its own address: /blog/article-name (e.g. /blog/pmos-diet-indian-food).

- [ ] Layout: title (H1) → author box (Mukta's photo, name, one-line credentials, link to About) → published and updated dates → the reel embedded near the top → article with H2 subheadings → "Related program" card → **Book a Consultation** + WhatsApp → 2–3 related articles.
- [ ] Fields she fills for each article: title, page title, description, image + alt text, category, related program.
- [ ] Categories that match the programs: Weight · Diabetes · Gut Health · PMOS & Hormones · Perimenopause & Menopause · Mind & Lifestyle · Yoga.
- [ ] Article structured data, an automatic sitemap entry and a share preview image for each article.
- [ ] Share buttons: WhatsApp, LinkedIn, Facebook, copy link.
- [ ] Medium: when an article is reposted on Medium, its canonical link points back to eatrrite.com.
- [ ] A simple admin login that works on mobile (Mukta's main device is her iPhone).

11.2 Monthly report (from the first month after launch)

The developer, or Claude from the data, sends Mukta one page each month:

Measure	Where it comes from
Google searches showing the site, and clicks	Search Console
Top 10 search phrases and pages	Search Console
Google Business Profile views, calls, website clicks, reviews	Business Profile
Visitors, by source (Google, Instagram, ads, WhatsApp)	GA4
WhatsApp clicks and bookings, by source	GA4 + booking sheet UTMs
Cost per booking (once ads run)	Google Ads / Meta Ads + booking sheet
Mobile speed score	PageSpeed Insights

12. Access needed and points to confirm

Access the developer needs (Mukta stays the owner of everything):

- [ ] Website hosting and code (or CMS login), and the domain DNS for eatrrite.com

- [ ] Google: Search Console, Analytics, Tag Manager, Ads, Business Profile (all on marketing.eatrrite@gmail.com)
- [ ] Meta Business Portfolio (Events Manager access only)
- [ ] The booking sheet and script ("eatrrite-website-appointments" and "slot-times-config" in the marketing Drive)

Mukta to confirm before the developer starts:

#	Question	Answer
1	Link to the Google reviews profile (the site shows 4.8★)	
2	Links to the YouTube client testimonial videos	
3	Written consent from Anju (and any other client) to show her testimonial with first name and city	
4	Certificate images (IGNOU, INFS Pune, Yoga Alliance, NLP Academy, life coach, university courses) and the Global Sustainability Award (none found in Drive)	
5	Captions for the event photos in 03 Talks, Sessions & Events: which event, place and year (ONGC, Millet Festival, ASC units and so on)	
6	OK to reprint the 2019 New Indian Express columns in full on the site?	
7	Publication dates of the 4 undated columns (detox, macro-micro, cholesterol, home-cooked food)	
8	WhatsApp automation provider (e.g. Interakt, WATI, AiSensy)
